

PRESS RELEASE

GEEPLUS ANNOUNCE THE WORLD'S SMALLEST BISTABLE ROTARY SOLENOID

Claimed to be the world's smallest bistable rotary solenoid, Geeplus have launched the tiny S1020 which measures a miniscule 2cms long and just 1cm in diameter.

Designed for the operation of optical shutters or very light frictionless loads, the S1020 has a surprisingly fast operating speed of less than 4ms with a 10 degree operating angle.
